- Book crossing in lane "Reading is good"

We promote the project "book crossing in lane" in all departments of the hospital in Vasto, starting from the awareness that reading is good, we took the reading with demand for physical and mental health where it is stronger: the hospital.

The purpose is to spread the love of reading as a "beneficial virus", that stimulates the body's natural defenses against the evils of life. The books are collected in the emergency room where there is the "book crossing point", then they are taken to the shelves in the various departments and no lists are available in the reading library.

- Music therapy and clown therapy

We are making the music therapy project with the intervention of the teacher Luca Raimondi. It is trying to establish a relationship with the music and clowns patients during their therapy interacting positively and according to situations are chosen rhythms and volumes suitable, music, songs, creating an atmosphere very special. The music more than the word becomes so therapeutic.
